

Q1:

- 1- **Program:** is a set of instructions that do a specific task. These instructions are written according to the rules of the language used.
- 2- **Comment:** are an important part of any program. They are explanatory statements that you can include in the C++ code. These comments help anyone reading the source code.
- 3- **Variables:** are reserved locations in the memory to store values.
- 4- **Keyword:** is a predefined word with a special meaning. int, class, if, and while are examples of keywords

B-

```
#include <iostream>
using namespace std;
int main()
{
    int no_days, no_weeks, no_months;
    cout<<"\nEnter a number of days: ";
    cin>>no_days;
    no_months=no_days/30;
    no_days=no_days%30;
    no_weeks=no_days/7;
    no_days=no_days%7;
    cout<<no_months<<" months "<<no_weeks<<" weeks "<<no_days<<" days "<<endl;
    return 0;
}
```

Q2: A-

Number	Square	Cube
3	9	27
4	16	64
5	25	125

B- There are no errors.
