TEMPLATE FOR PROGRAMME SPECIFICATION

HIGHER EDUCATION PERFORMANCE REVIEW: PROGRAMME REVIEW

PROGRAMME SPECIFICATION

This Program Specification provides a concise summary of the main features of the program and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It is supported by a specification for each course that contributes to the program.

1. Teaching Institution	University of Diyala
2. University Department/Centre	College of Engineering
3. Program Title	Electronic Engineering
4. Title of Final Award	BSc in Electronic Engineering
5. Modes of Attendance offered	Courses
6. Accreditation	N/A
7. Other external influences	None
8. Date of production/revision of this specification	20/09/2023
9. Aims of the Program	
<ul style="list-style-type: none">• Preparing the student scientifically to work in the field of Electronic engineering• Build and prepare the student psychologically to play his role as a reliable engineer in this field.• Building students capable of competing with other engineers for job opportunities and obtaining the required seats to complete postgraduate studies.• Ability to submit to external tests by local, regional or international bodies for the purpose of completing studies or appointment.• Urging the student to be creative and think about specialization projects and keep pace with developments in this field.• Providing students with scientific, practical and personal skills that enable them to solve practical problems and deal with them using scientific concepts.	

10. Learning Outcomes, Teaching, Learning and Assessment Methods

- A. Cognitive goals
- A1- Teaching the student the principles of how electronic circuits work and how to deal with theories and algorithms.
 - A2- Enabling students to obtain knowledge and understanding in working on and designing electronic circuits.
 - A3- Teaching the student the methods of forming electronic components and their interconnection.
 - A4- Enabling students to obtain knowledge and understanding of designing everything related to electronic circuits.
 - A5- Enabling students to obtain knowledge and understanding of diagnosing faults and maintaining various electronic circuits.
 - A6- Teaching the student the foundations of solving programming problems, computer networks, and communications.

B. The skills goals special to the program.

- B1 - Explanation of electronic circuits principles topics by specialists in the subject, with an emphasis on the use of mathematics as a basis for understanding and learning.
- B2 - Providing them with skills to solve practical problems related to various electronic circuits for addressing and solving technical problems in various fields of computerized work.

Teaching and Learning Methods

- Providing students with the basics and additional topics related to previous educational outcomes and skills to solve practical problems.
- Solving a group of practical examples by the academic staff.
- Students participate during the lecture in solving some practical problems.
- The department's scientific laboratories are monitored by the academic staff.

Assessment methods

- Daily exams with practical and scientific questions.
- Participation marks for difficult competition questions among students.
- Assigning grades to homework assignments and reports assigned to them.
- Monthly exams for the curriculum in addition to the final exam.

C. Affective and value goals

- C1- Enabling students to think and analyze topics related to the engineering framework, such as various logical circuits.
- C2- Enabling students to think and analyze topics related to electronic devices related to the engineering framework.
- C3- Enabling students to think and analyze topics related to solving practical problems.

Teaching and Learning Methods

- Providing students with the basics, additional topics, and field experiences related to the outcomes of thinking and analysis.
- Forming discussion circles during or outside lectures to discuss scientific engineering topics that require thinking and analysis.
- Asking students, a set of thinking questions during lectures, such as (what, how, when, why) for specific topics.
- Giving students homework and periodic reports.

Assessment methods

- Daily exams with practical and scientific questions.
- Participation marks for difficult competition questions among students.
- Assigning grades to homework assignments and reports assigned to them.
- Semester exams for the curriculum in addition to the final exam.

D. General and Transferable Skills (other skills relevant to employability and personal development)

D1- Enabling students to write reports and notes on various branches of Electronic engineering.

D2- Enabling students to know how to use the Internet to obtain important information.

D3- Raising the student's self-confidence by linking theoretical material to practical reality.

D4- Developing students' skills in how to deal with computer hardware and software problems and how to deal with them.

Teaching and Learning Methods

- Through the Daily lectures by seminar and discussions
- discussion circles during lectures to discuss scientific engineering topics that require thinking and analysis.
- Asking students, a set of thinking questions during lectures, such as (what, how, when, why) for specific topics

Assessment Methods

- Evaluating the seminar and reports that submitted by students and providing them with the necessary feedback to improve their skills and self confidence

11. Program Structure

Level/Year	Course or Module Code	Course or Module Title	Credit rating	12. Awards and Credits
1 st Year-1 st Semester	E 101	Mathematics 1	6	
1 st Year-1 st Semester	EE 101	Electrical Engineering Fundamentals 1	8	
1 st Year-1 st Semester	EE 107	Electronic Physics	6	
1 st Year-1 st Semester	EE 106	Engineering Drawing	4	
1 st Year-1 st Semester	U 103	Computer Skills	4	
1 st Year-1 st Semester	U 104	English Language	2	

1 st Year-2 nd Semester	E 102	Mathematics 2	6
1 st Year-2 nd Semester	EE 102	Electrical Engineering Fundamentals 2	8
1 st Year-2 nd Semester	EE 103	Digital techniques	7
1 st Year-2 nd Semester	EE 105	C++ Programming	4
1 st Year-2 nd Semester	EE 104	Workshops skills	3
1 st Year-2 nd Semester	U 101	Human Rights and Democracy	2
2 nd Year-1 st Semester	E201	Advance Mathematics –I	3
2 nd Year-1 st Semester	EE 201	Electronics I	2
2 nd Year-1 st Semester	EE 203	Electric Circuits Analysis I	2
2 nd Year-1 st Semester	EE 205	Advanced Programming	1
2 nd Year-1 st Semester	EE 208	Electro-Magnetics I	2
2 nd Year-1 st Semester	EE 210	Digital Electronic I	2
2 nd Year-1 st Semester	EE 206	Machines (DC)	2
2 nd Year-2 nd Semester	E202	Advance Mathematics- II	3
2 nd Year-2 nd Semester	EE 202	Electronics II	3
2 nd Year-2 nd Semester	EE 204	Electric Circuits Analysis II	2
2 nd Year-2 nd Semester	EE 212	Measurement & Instruments	2
2 nd Year-2 nd Semester	EE 209	Electro-Magnetics II	2
2 nd Year-2 nd Semester	EE 211	Digital Electronic II	3
2 nd Year-2 nd Semester	EE 207	Power and AC Machines	4
2 nd Year-2 nd Semester	EE 213	University Culture Activity	-

3 rd Year-1 st Semester	EE 301	Digital Signal Processing I	2
3 rd Year-1 st Semester	EE 309	Advanced Electronics I	3
3 rd Year-1 st Semester	EE 303	Communication Systems I	3
3 rd Year-1 st Semester	EE 305	Microprocessor and Microcontroller: Hardware	3
3 rd Year-1 st Semester	EE 307	Engineering Analysis I	2
3 rd Year-1 st Semester	EE 311	Antenna	3
3 rd Year-2 nd Semester	EE 312	Engineering Administration	2
3 rd Year-2 nd Semester	EE 302	Digital Signal Processing II	3
3 rd Year-2 nd Semester	EE 310	Advanced Electronics II	3
3 rd Year-2 nd Semester	EE 304	Communication Systems II	3
3 rd Year-2 nd Semester	EE 306	Microprocessor-Based System: Programming	2
3 rd Year-2 nd Semester	EE 308	Engineering Analysis II	2
3 rd Year-2 nd Semester	EE 313	Optoelectronics	2
Fourth Year-1 st Semester	EE 401	Microelectronic I	2
Fourth Year-1 st Semester	EE 403	Power Electronics I	3
Fourth Year-1 st Semester	EE405	Control System I	3
Fourth Year-1 st Semester	EE407	Digital System Design	3
Fourth Year-1 st Semester	EE 409	Information Theory	3
Fourth Year-1 st Semester	EE411	Hardware Description Language (HDL) Programming	3
Fourth Year-2 nd Semester	EE 413	Introduction to AI	2
Fourth Year-2 nd Semester	E402	Eng. Graduation Project I	2

Fourth Year- 2 nd Semester	EE402	Microelectronic II	2
Fourth Year- 2 nd Semester	EE404	Power Electronics II	3
Fourth Year- 2 nd Semester	EE406	Control System II	3
Fourth Year- 2 nd Semester	EE408	Advanced Digital System Design	3
Fourth Year- 2 nd Semester	EE410	Microwave	2
Fourth Year- 2 nd Semester	E401	Engineering Profession Ethics	2
Fourth Year- 2 nd Semester	EE412	Digital Image Processing	2
Fourth Year- 2 nd Semester	E403	Eng. Graduation Project II	2

13. Personal Development Planning

It is planned to develop the students' personalities by holding discussion circles with them and asking them for periodic reports and seminars throughout the four stages and on various topics to develop their personal development.

14. Admission criteria .

According to the rules and regulations of Ministry of Higher Education and Scientific Research.

15. Key sources of information about the program

- College website.
- The department's website and contact the department by email.

Curriculum Skills Map

please tick in the relevant boxes where individual Programme Learning Outcomes are being assessed

				Programme Learning Outcomes															
Year / Level	Course Code	Course Title	Core (C) Title or Option (O)	Knowledge and understanding				Subject-specific skills				Thinking Skills				General and Transferable Skills (or) Other skills relevant to employability and personal development

TEMPLATE FOR COURSE SPECIFICATION

HIGHER EDUCATION PERFORMANCE REVIEW: PROGRAMME REVIEW

COURSE SPECIFICATION

This Course Specification provides a concise summary of the main features of the course and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It should be cross-referenced with the programme specification.

1. Teaching Institution	University of Diyala
2. University Department/Centre	College of Engineering
3. Course title/code	Communication Systems I / EE 303
4. Modes of Attendance offered	Class Lectures
5. Semester/Year	1 st Semester – 3 rd Year
6. Number of hours tuition (total)	30 hours
7. Date of production/revision of this specification	20/09/2023
8. Aims of the Course	The subject of Communications Systems I aims to teach the student during the semester the basic idea and mathematical principles of communications systems and their types. Where the student learns the principles and mathematical principles of electrical signals and the processes that occur on the signals when they pass through a communication system. In addition, the noise that interferes with electrical signals during their transmission, the noise sources and types of noise in communications systems.

9. Learning Outcomes, Teaching ,Learning and Assessment Methods

A- Cognitive goals.

A1- During the semester, the student learns the types of electrical signals and how to deal with them.

A2- During the semester, the student learns how to types of communication systems.

A3- Learn how to transmit and receive the electrical signals.

A4- The student learns the noise and its effect on the communication quality.

B. The skills goals special to the course.

B1 - Familiarity with the electrical signals and their mathematical expression.

B2- Learn how to calculate the signals power and energy.

B3- Learn how to draw the spectrum of periodic and non-periodic signals.

B4- Familiarity with the noise in communication systems.

Teaching and Learning Methods

- The lecturer prepares lectures on the subject in paper and electronic form and presents them to the students.
- The lecturer delivers lectures in detail.
- The lecturer requests periodic reports and homework assignments on the basic topics of the subject.

Assessment methods

- Daily discussion to determine the extent of students' understanding of the material and to evaluate the daily contributions.
- Daily exams with various short scientific questions to understand the extent of their understanding of the material.
- Giving part of the semester's grade to homework assignments.
- Daily exams (Quiz) and monthly exams for the curriculum and the final exam

C. Affective and value goals

C1- Urging the student to understand the purpose of studying the subject in general.

C2- Urging the student to understand the operation of each part in the communication system.

C3- Urging the student to think about how to develop himself in the field of communication theory.

C4- Making the student able to deal with the calculator and how to use the programs.

Teaching and Learning Methods

- Providing students with the basics, additional topics, and field experiences related to the outcomes of thinking and analysis.
- Forming discussion circles during or outside lectures to discuss scientific engineering topics that require thinking and analysis.
- Asking students, a set of thinking questions during lectures, such as (what, how, when, why) for specific topics.

Assessment methods

- Daily exams with practical and scientific questions.
- Participation marks for difficult competition questions among students.
- Assigning grades to homework assignments and reports assigned to them.
- Semester exams for the curriculum in addition to the final exam.

D. General and rehabilitative transferred skills (other skills relevant to employability and personal development)

D1- Enabling students to write reports on topics related to communication systems.

D2- Enabling students to know how to use the Internet to obtain important information.

D3- Raising the student's self-confidence by linking theoretical material to practical reality.

D4- Developing students' skills in how to deal with signals and systems.

Week	Hours	Unit/Module or Topic Title	Teaching Method	Assessment Method
Week 1	3	The reasons to use communication system	Lectures Notes PDF power point Video	Daily exams + monthly exams
Week 2	3	Elements of a communication system	Lectures Notes PDF power point Video	Daily exams + monthly exams
Week 3	3	Definitions and terms	Lectures Notes PDF power point Video	Daily exams + monthly exams
Week 4	3	Types of signals,	Lectures Notes PDF power point Video	Daily exams + monthly exams
Week 5	3	Types of Systems	Lectures Notes PDF power point Video	Daily exams + monthly exams
Week 6	3	Spectrum of periodic signals (Fourier series)	Lectures Notes PDF power point Video	Daily exams + monthly exams
Week 7	3	Spectrum of non-periodic signals (Fourier transforms, and inverse	Lectures Notes PDF power point	Daily exams + monthly exams

		Fourier transform)	Video	
Week 8	3	Power spectral density and energy spectral density	Lectures Notes PDF power point Video	Daily exams + monthly exams
Week 9	3	Frequency response of linear system	Lectures Notes PDF power point Video	Daily exams + monthly exams
Week 10	3	Time delay, Convolution, Transversal filters	Lectures Notes PDF power point Video	Daily exams + monthly exams
Week 11	3	Signals correlation	Lectures Notes PDF power point Video	Daily exams + monthly exams
Week 12	3	Distortion and distortion types and their effects on communication systems.	Lectures Notes PDF power point Video	Daily exams + monthly exams
Week 13	3	Noise, Types of noise	Lectures Notes PDF power point Video	Daily exams + monthly exams
Week 14	3	Noise figure,	Lectures Notes PDF power point Video	Daily exams + monthly exams
Week 15	3	S/N ratio	Lectures Notes PDF power point Video	Daily exams + monthly exams

11. Infrastructure	
1. Books Required reading:	Introduction to communication systems. By: Stremler
2. Main references (sources)	<ul style="list-style-type: none"> • Lectures presented by the Lecturer • Books available in the college library

3- Electronic references,
Internet sites...
