## Learning and Teaching Strategies

### استراتيجيات التعلم والتعليم

| Strategies | • The module will be delivered using a combination of lectures, tutorials, and directed and independent learning. <br> • The learning and teaching approach will include the introduction of theoretical basis in the lecture form and the application aspects will be further studied throughout the tutorial sessions, including problem solving. In direct learning, you will be instructed to prepare for the lectures including reading the notes, finding and analyzing relevant information in advance. <br> • Working group (2-3 students per group) will be formed to encourage you to engage critical discussion in class. <br> • Case studies will be used to demonstrate and reinforce the lectures and labs. <br> • Solving examples, problems will give experience to understand the complex cases in communication field. |

| | **F –** Fail | راسب | (0-44) | Considerable amount of work required |
| | | | | |

**Note:** Marks Decimal places above or below 0.5 will be rounded to the higher or lower full mark (for example a mark of 54.5 will be rounded to 55, whereas a mark of 54.4 will be rounded to 54. The University has a policy NOT to condone "near-pass fails" so the only adjustment to marks awarded by the original marker(s) will be the automatic rounding outlined above.
