Academic Program Description Form

University Name: Diyala

Faculty/Institute: College of Engineering

Scientific Department: Communications Engineering Academic or Professional Program Name: Bachelor

Final Certificate Name: bachelor of Science in Communications Engineering

Academic System: Course

Description Preparation Date: 6 - 7 - 2025

File Completion Date: 6 - 7 - 2025

Signature:

Head of Department Name:

Assit. Prof. Or. Molommed S. Saleh

Date: 6-7-2025

Signature:

Scientific Associate Name:

Dr. Jabbar Kas.m Jabar

Date: 6-7-2025

The file is checked by: Assist 2nd pr. Salah W. Forhan Department of Quality Assurance and University Performance

Director of the Quality Assurance and University Performance

Department:

Date: 6-7-2025 .

Signature:

Approval of the Dean

prof. Dr. Anes A. Khadom

1. Program Vision

The department going to develop the curriculum in line with modern scientific developments in the field of communications engineering in addition to completing all the special requirements of scientific laboratories in the department. We seek to improve the staffed of teaching by dispatching members of Department of postgraduate in both inside and outside the country, and configure the appropriate conditions for scientific research in order to get Degrees required to be a Department able to compete in its own right and marked with the corresponding sections only local of which or the Arab and international Our ambitions We aspire to open graduate studies for a master's certificate in the disciplines of engineering various communication to be Department of scientific expertise to attract local and international center of which to open the horizons of cooperation through conferences, consulting, training, scientific research and development through broad and orderly opening to the community.

2. Program Mission

Expanding educational base and their applications in modern field of telematics and communications across both the international network and devices and cellular all advanced communication systems form that meets the need of institutions, both belonging to the state or the private sector through education, training and rehabilitation input from Human Resources (students) and make them able to deal with modern techniques and working in different institutions efficiently and effectively serve our dear country march.

3. Program Objectives

4. Program Accreditation

Teach students studying in the department on techniques required in all areas of modern communication systems and their applications in scientific and field state departments. Qualify graduates capable of working in government departments and the private sector engineering staff specialist efficiently and effectively. Contribute to provide an advanced level of related activities and the realization of the institutions experience and lead to the fulfillment of their need of human resources in order to achieve their success and the evolution and continuation.

8. Expected learning outcomes of the program

Knowledge

- A. Cognitive goals
- A1. Understanding and teaching the student the principles of how signal work and how to deal with communication algorithms.
- A2- Enabling students to obtain knowledge and understanding in working on and designing signal and system .
- A3- The student understands the methods of forming signal and system parts and their interconnection.
- A4- Enabling students to obtain knowledge and understanding of designing everything related to optical signal and system.
- A5- Enabling students to obtain knowledge and understanding of diagnosing faults and maintaining various signal and system devices.
- A6- The student understands the foundations of solving communication problems, cellular networks, and etc.

Skills

- A. The skills goals special to the program.
- B1 Explanation of communication principles topics by specialists in the subject, with an emphasis on the use of mathematics as a basis for understanding and learning.
- B2 Providing them with skills to solve practical problems related to various communication systems and algorithms for addressing and solving technical problems in various fields of Communication engineering.
- B3 Obtaining experience to explore and develop communication systems and its algorithms.

Ethics

- A. Affective and value goals
- C1- Enabling students to think and analyze topics related to the engineering framework, such as various logical circuits.
- C2- Enabling students to think and analyze topics related to Communication systems related to the engineering framework.
- C3- Enabling students to think and analyze topics related to solving practical problems.

9. Teaching and Learning Strategies

- □ Providing students with the basics, additional topics, and field experiences related to the outcomes of thinking and analysis.
 □ Forming discussion circles during or outside lectures to discuss scientific
- engineering topics that require thinking and analysis.
- ☐ Asking students a set of thinking questions during lectures, such as (what, how,

when, why) for specific topics.		

10. Evaluation methods
☐ Daily exams with practical and scientific questions.
☐ Participation marks for difficult competition questions among students.
☐ Assigning grades to homework assignments and reports assigned to them.
☐ Semester exams for the curriculum in addition to the final exam.

11. Faculty

Faculty Members

Professional Development

Mentoring new faculty members

Faculty members are instructed to hold regular meetings and review questionnaires received from students with the Scientific Committee.

Professional development of faculty members

The teaching staff undergoes development through training, workshops, and seminars. Progress is evaluated by subject performance.

12. Acceptance Criterion

According to the rules and regulations of Ministry of Higher Education and Scientific Research.

13. The most important sources of information about the program

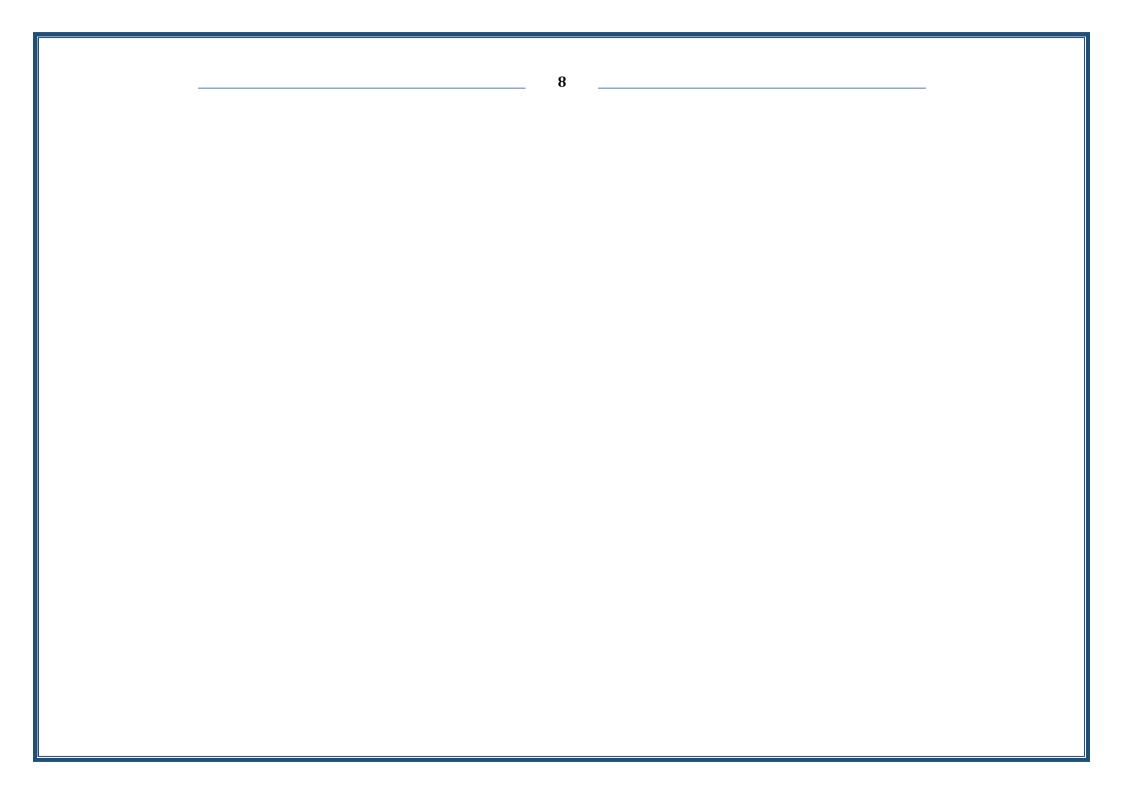

- College website.
- The department's website and contact the department by email.

14. Program Development Plan

- The courses are updated annually to keep up with developments of the world.
- The laboratories are also updated under academic curricula.
- Additionally, postgraduate programs are now being offered.

		24-4-2024						
5. Available Atten	dance Forms:							
		None						
6. Number of Cred	lit Hours (Tot	tal) / Number of Unit	s (Total)					
		30h						
7. Course admin	istrator's na	me (mention all, if r	more than on	e name)				
Name: Asisst. Prof	. Haraa Raheen	n Hatem		,				
Email: Haraa_alt	aie_eng@uod	iyala.edu.iq						
8. Course Objective	es							
Course Objectives	Familiarity vLearn and uExploring th	course, students will learn with important programs in inderstand the equations for the differences between the es between lossy and lossle	n the field of ima or testing the prof media and their	iciency of images				
9. Teaching and Le	earning Strate	gies						
Strategy In this course, students are guided by: Using different examples. Using different styles of discussion that aim to connect the theoretical and practical sides. Asking questions and giving exercises that require analysis and conclusions related to lectures. Encourage students to participate in discussions and do the practical work. Encourage students to work in groups.								
10. Course Structure Week Hours Require	ed Learning	Unit or subject	Learning	Evaluation				
Outcom	_	name	method	method				

1 st	2	Services	Overview of Multimedia Processing & Coding	Lecture PDF power point Video	Daily exams + monthly exams
